

Shyam Bahety

352-740-5714 | San Fransisco, CA | shyambahety98@gmail.com | shyambahety.com | linkedin.com/in/bahetyshyam

Education

University of Florida

Masters of Science in Computer Science (GPA: 3.66/4.0)

Gainesville, FL

Aug 2023 – May 2025

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C#, RLang

Frameworks and Libraries: ReactJS, VueJS, Node.js, ReactNative, Flask, FastAPI, GraphQL, Redux, Webpack

Developer Tools: Git, Docker, AWS, GCP, CI/CD pipelines, Jenkins, Jira, Linux, Unit Testing

Database Management Systems: SQL, NoSQL, MongoDB, Microsoft SQL, Oracle SQL, MySQL

Experience

Forward Deployed Engineer

May 2025 – Present

Postman

San Francisco, CA

- Spearheading the development of internal **AI agents** that autonomously analyze data and make executive-level decisions, driving operational efficiency and projected cost savings of thousands of dollars annually.
- Designing and building scalable tools for enterprise clients to **streamline API management**, enhance team collaboration, and improve API discoverability across large organizations.

Software Developer Intern

May 2024 – Aug 2024

CommerceIQ

Remote, United States

- Designed and developed a **new scalable UI platform** from scratch to replace a 7-year-old legacy system, reducing development time by more than two-thirds and improving system performance and scalability by using **VueJS**
- Revamped the reporting interface by integrating **interactive data visualization widgets**, leading to a 1.4x increase in user engagement and receiving positive feedback from 85% of users
- Created **reusable UI components** adopted by other teams for new product lines, reducing the time for adding new widgets from 2-3 weeks to just 2 days, achieving a 90% reduction in time-to-market
- Contributed to the success of closing half of the deals with prospects by building a cutting-edge platform for visualizing complex e-commerce data using **VueJS** which resulted in driving up sales

Front End Developer 2

Dec 2021 – Aug 2023

CommerceIQ

Bengaluru, India

- Spearheaded the development and successful delivery of high-impact features for retail giants such as **Walmart and Target using VueJS**, contributing to an impressive 80% contract renewal rate among customers
- Pioneered the conception and development of advertising tools meant for industry leaders such as Amazon and Walmart, resulting in a remarkable 40% expansion of the customer base
- Designed **configurable, reusable components** that increased adaptability and functionality based on configurations, resulting in a 50% reduction in development time and a significant improvement in system performance
- Received recognition and an award for the swift delivery of a product, which was instrumental in establishing a partnership with Walmart, leading to CommerceIQ's official designation as a partner and boosting brand visibility

Software Development Engineer

Aug 2020 – Dec 2021

Betsol Pvt Ltd

Bengaluru, India

- Orchestrated a comprehensive **user interface overhaul**, integrating the FluentUI library and transitioning 70% of the codebase from **JavaScript to TypeScript** for enhanced functionality and maintainability
- Managed and optimized the user interface of a distributed backup application, developed using **ReactJS (JavaScript+TypeScript)** & ElectronJS, achieving a substantial 90% code coverage to ensure high-performance, reliable, testable, and maintainable code
- Executed the implementation of **new features for complex UI components**, enhancing overall functionality and user experience, resulting in a 20% reduction in support tickets related to UI issues

Projects

Automated Attendance System | Undergrad Project | React, Python, Flask, MongoDB

- Engineered a **scalable Progressive Web App (PWA)** that automates student attendance by processing submitted class photos
- Developed the user interface with ReactJS and crafted the backend server using Flask. Implemented **face detection and identification** with OpenCV and Convolutional Neural Network libraries, achieving a 90% accuracy rate. Utilized MongoDB for efficient database storage, reducing query response times by 60%

Sorting Visualizer | Personal Project | React, TypeScript, JavaScript

- Engineered an interactive **sorting visualizer web application**, implementing multiple sorting algorithms and enabling users to dynamically adjust array size and animation speed
- Optimized visualization performance by leveraging **efficient DOM manipulation techniques**, reducing render time by 40% and allowing smooth animations for arrays of up to 50 elements
